

## TRIED & TESTED

# A great way to soften your skin

**PRODUCT:** Aqua Radiance Skin Shine at Kaya Skin Clinic

**PROMISE:** To soften skin

**TESTER'S SKIN TYPE:** Normal

**PROS:** We visited the Bandra outlet for our treatment. There, it is termed as 'a revolutionary service with nature's essentials - water, oxygen and air'. It uses the infusion of Vitamin B5, which leaves your skin refreshed and glowing. This facial is most apt for oily skin. Before your treatment begins, you have a small session with the in-house dermatologist who examines your skin. The one-hour treatment is relaxing, and the staff is well trained. They explain each process step by step, so you're fully aware of what's going on. The treatment helps combat acne by improving the skin's hydration, maintaining elasticity and increasing softness.

**CONS:** The only thing we personally disliked was that the blackhead removal process was slightly painful.

- Shalvi Mangaokar

**VERDICT:** For the price, ₹2,000, the treatment is totally worth it. It definitely softens your skin and the glow is visible in a day's time. And its effects do last.
